Zimbabwe Sugar Association Experiment Station

High School Competition Entry Form

Call for Entries

Second Lowveld High School Science Competition

Zimbabwe Sugar Association Experiment Station invites high school learners to participate in the annual Lowveld Science Competition. Learners are invited to submit their ideas by completing the application form that should be approved by their respective science teachers and school head. Selected projects will exhibit and compete at the 28th Zimbabwe Sugar Industry Seminar that will be held at the Triangle Country Club on Thursday 19 October 2023. The primary objective of the competition is to develop research, critical thinking and information literacy skills through researching and innovation.

Who may enter?

Learners from Form one to six who are enrolled in a secondary school in Chiredzi district.

Types of science projects

Experiment - An experiment can be a test made to demonstrate a known scientific fact or it can also be a test to determine if a hypothesis is accurate

Model - A model is a small object usually built to scale that represents some already existing object.

Demonstration - A demonstration is an illustration or explanation of a scientific principal that shows how and why something works.

Collection - A collection is a grouping or gathering of various objects which must

be scientifically oriented and show that you have learned something through the process of collecting and categorizing.

Invention - An invention is a new device or process used to improve conditions, solve problems, or to fill needs. Inventions can be completely new ideas or improvements on something that already exists today.

Limitations

Each student is only allowed to enter one project.

Team projects must have no more than three (3) members.

Each school is allowed to submit a maximum of three projects

Important dates

Deadline to submit entry forms	30 June 2023
Notification of projects participating in the finals	30 July 2023
